

About Us

We have a beautiful 90-bed assisted living facility which boasts a relaxing and serene koi pond as well as shuffleboards with an arbor garden area. We offer two specialized secure units, one for Dementia residents with behaviors and a non-Dementia unit with behaviors.

Our Dementia behavioral unit addresses the needs of individuals that exhibit behaviors beyond their diagnosis. The Non-dementia behavior unit is for individuals who are unable to reside in a traditional setting due to their behaviors. Both of our behavior units are overseen by our Clinical Director, a Behavioral psychologist who provides weekly in service training to our staff.

There are many things that make Austin House a home for those who live here. Whether it's the home cooked meals served family style or the person centered care; our caregivers strive to encourage and assist our residents to live a full and productive life. Our employees are trained to show their respect and love for our residents in all aspects of their jobs. At Austin House, we set a high standard of excellence in the care of those entrusted to us. Our caregivers are selected for their attention to detail, professionalism and a caring and compassionate demeanor.

Austin House Assisted Living offers three unique units to serve our Northern Arizona community.

Here at Austin House, we like to take a team approach in addressing the needs and care of our residents. Doctors, the facility staff, the resident and the family all take part in the determining the best plan of action in the care of your loved one. Personalized care is what your loved one deserves and receives at Austin House.

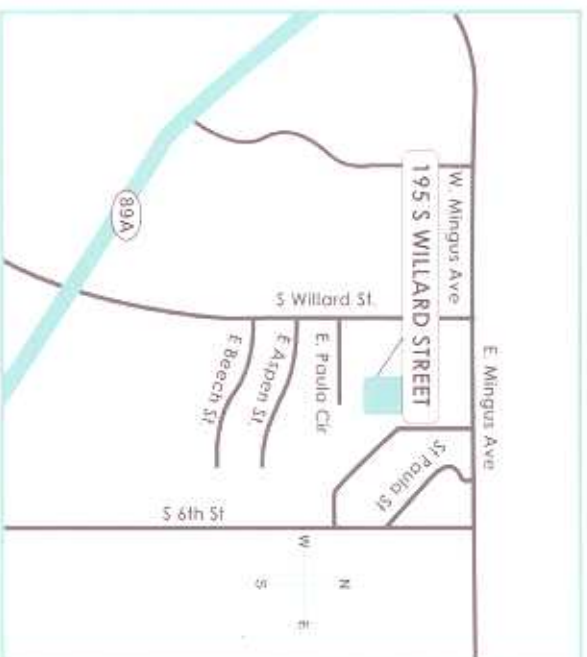

Serving Northern Arizona

Austin House is located 100 miles north of Phoenix, in beautiful Cottonwood, Arizona. Tucked among neighboring medical services, we offer an excellent blend of service and security amid the scenic vistas of the Verde Valley
