## Funeral Service Options

No one can tell what is the best way for you to honor the life of your loved one. In our best effort to provide the most thoughtful service at the most affordable cost, we have itemized the many options we offer. We realize that each and every service may have special requests, desires and wishes.

### Traditional Funeral Service

This is a funeral service with the deceased present, and usually includes an open casket viewing the evening before, or prior to the service. The visitation typically takes place at the funeral home, with the funeral service taking place at a church. However, these services can also take place in the funeral chapel. Embalming is required for an open casket public viewing.

### Graveside Funeral Service

This is a funeral service with the deceased present; however, the casket may not be open. There may be a visitation prior to the Graveside Service at the funeral home. If no viewing is to take place, embalming is not required by law, except in certain cases.

### Traditional Memorial Service

The Traditional Memorial Funeral Service with the deceased present usually includes an open casket viewing prior to the service, with the funeral service taking place in a church or chapel. Instead of burial, the deceased is cremated following the services.

### Celebration of Life / Gathering of Friends

An informal format that allows for the deceased to be remembered in a way that highlights his or her uniqueness, without the structure of a traditional service.

### Immediate Burial Service

This is a funeral service without any viewing or casketing, or use of the funeral facilities for services. Embalming is not required except in certain cases. If no embalming after 24 hours, refrigeration is required.

### Direct Cremation

This is a funeral arrangement without any viewing, casketing, or use of the funeral facilities for services. Embalming is not required except in certain cases. If the deceased is not embalmed after 24 hours, refrigeration is required.

Our crematory requires a rigid combustible container for cremation. We use a container manufactured locally by Yavapai Exceptional Industries (Y.E.I.), thus allowing us to give a portion back to our community.

### Forwarding & Receiving of Remains

We can assist you with making arrangements to have your loved one transported to or from any funeral home, nationally or internationally.
